MONTANA WATER DEVELOPMENT PROGRAM

GUIDELINES FOR PREPARING
PRIVATE LOAN APPLICATIONS

This booklet assists individuals, partnerships, associations, and corporations in applying for loans under Montana's Water Development Program. It describes eligible loan applicants, funding limits, eligible projects and activities, loan approval and funding procedures, and applicant responsibilities. The booklet includes application forms.

If you have any questions write or call:

Department of Natural Resources
and Conservation
Conservation and Resource
Development Division
Resource Development Bureau
1520 East Sixth Avenue
Helena, MT 59620-2301

Applications may be submitted to the department at any time.

IF YOU WANT BOTH A GRANT AND A LOAN, YOU MUST ALSO COMPLETE A WATER DEVELOPMENT GRANT APPLICATION. THAT APPLICATION MUST BE SUBMITTED TO DNRC BY MAY 15 OF EVEN-NUMBERED YEARS. GRANTS CANNOT EXCEED \$100,000 OR 25 PERCENT OF THE TOTAL COST OF THE PROJECT. GRANTS MUST BE APPROVED BY THE MONTANA LEGISLATURE.

DEPARTMENT OF NATURAL RESOURCES AND CONSERVATION
WATER DEVELOPMENT PRIVATE LOAN PROGRAM

The Water Development Private Loan Program was established by the Montana Legislature in 1981 and is administered by the Department of Natural Resources and Conservation (DNRC). It promotes the beneficial use of water, and allows Montanans to achieve full use of the state's water by providing financing for water development projects and activities. DNRC is authorized to issue up to \$10 million in state general obligation bonds for this program.

ELIGIBLE APPLICANTS

Individuals, partnerships, associations, and corporations are eligible for Water Development private loans.

ELIGIBLE PROJECTS

Projects that conserve, distribute, develop, store, and use water for beneficial uses are eligible for funding. Also eligible are activities that protect and enhance water resources by promoting efficient use, management, and protection of water.

Examples of eligible projects include constructing gravity irrigation systems, rehabilitating irrigation systems, building or repairing irrigation dams, lining and consolidating ditches, automating irrigation systems, and developing rural water supplies.

Preliminary planning must be complete before construction funds are requested. The Soil Conservation Service (SCS), irrigation supply companies, or private professional engineers usually provide the preliminary planning work. Costs for final design planning and construction supervision by a professional engineer may be included in a construction proposal.

LOAN LIMITS

Private loans may not exceed \$200,000, and are funded from sale proceeds of general obligation bonds. Loan interest rates will be the same rate as that of the state bond. Repayment periods may not exceed 30 years, and are limited to the life of the project. Repayments on the loan are generally in annual installments.

APPLICATION AND APPROVAL PROCESS

Loan applications are accepted by DNRC at any time. The Water Development Bureau reviews the applications for completeness. You will

be notified if application forms and required documentation are not complete, and you will be given a specific time to complete the requirements. Applications are then evaluated to determine if they are technically and financially feasible. During this process, you may be required to submit additional documentation. Other state and federal agencies may be consulted to complete these evaluations. A staff recommendation is submitted to DNRC's director who makes the final decision on funding the project.

FUNDING SCHEDULES

State bond sales to finance the loans are generally phased with the construction season, so money will be available in time to meet project schedules. Successful applicants will be notified of the proposed state bond sale and the anticipated interest rate prior to each sale. If you need other funds in addition to DNRC funding, funding commitments must be made before DNRC includes the project in a state bond sale. Once funds are available, contract documents and loan and mortgage agreements will be signed. Disbursal can be on a schedule compatible with project construction. You may request DNRC to commit to providing long-term funding so that you can obtain interim financing elsewhere, if your construction schedule precedes loan availability. DNRC approval of interim financing is based on its acceptance of the technical and economic feasibility of the project.

SPONSOR RESPONSIBILITIES

Detailed scopes of work and budgets are included in all agreements, and must be approved by DNRC before you start work on the project. EXPENSES YOU INCUR BEFORE THE LOAN IS APPROVED WILL NOT BE REIMBURSED.

DNRC must approve procedures for contracting for professional services. All state laws on contracting and bid procedures for construction projects must be followed, and you must also keep accurate financial records and documentation for audits. DNRC can provide information about these requirements. DNRC must be permitted to monitor performance and visit the project site.

Narrative progress reports and financial reports may be required quarterly. A final report is required when the project is complete. You may also be required to submit annual financial reports during the life of the loan.

**Please include a non-refundable
\$150 application fee.**

PRIVATE LOAN APPLICATION CHECKLIST

- ___ 1. Application Fee \$150.00 (Make checks payable to DNRC)
- ___ 2. Application Summary
- ___ 3. Technical Narrative
- ___ 4. Technical Documentation
 - a. Statistical or technical reports on natural resource features of the project site
 - b. Narrative reports on the natural resource features of the project
 - c. Engineering design reports
 - d. Maps
 - e. Property records and permits
 - f. Water right permits
- ___ 5. Financial Documentation
 - a. Construction budget (with accompanying cost estimates)
 - b. Statement of financial condition
 - c. Profit or loss statement
 - d. Documentation for income sources
 - e. Three-year projected operating budget for the project
 - f. Description of loan collateral
 - g. Abstract of title or other evidence of ownership
 - h. Other funding commitments or status documentation
- ___ 6. Representative Pictures of the Project and/or Problem

One copy of your application and supporting documents should be mailed to:

Department of Natural Resources
and Conservation
Conservation and Resource
Development Division
Resource Development Bureau
1520 East Sixth Avenue
Helena, MT 59620-2301

Inquiries may be mailed to DNRC, or call 444-6668.

TECHNICAL NARRATIVE
INSTRUCTION SHEET

At a minimum, the technical narrative should include the following:

Checklist

- ___ A. A clear statement of the purpose of the project and the specific objectives to be accomplished.
- ___ B. A thorough description of the project that shows how the project will accomplish the objectives.
- ___ C. A discussion of the history of the project or problem addressed by the project, and all work previously conducted.
- ___ D. A description of the technical alternatives and the reason the proposed alternative was selected.
- ___ E. A specific description of the implementation plan.
- ___ F. A schedule, (preferably in chart form) for completing the project.
- ___ G. A discussion of the effects, positive or negative, the project will have on water quantity and quality, soils, vegetation, wildlife, and other natural resources.
- ___ H. A description of the final project results, how they will be used, and by whom.

II. Instructions for Documentation

You are urged to submit as much relevant, sound documentation about the project as you have.

- A. Include appropriate data on the natural features of the project area such as soils, vegetation, geology, and hydrology. Include completed technical reports and studies on the project. All engineering design work submitted for construction projects should name the design standards used, and should be prepared by a professional engineer licensed to practice in Montana. DNRC may exempt the professional engineer requirement if work is done by an experienced person in the project field, following designs established by a professional engineer. An example of this circumstance might be an irrigation project with design work completed by a technician following Soil Conservation Service (SCS) design procedures.

- B. Include a topographic map or aerial photo that locates the project or activity by sections, townships, and ranges. Identify all proposed construction sites, sources of water, points of water diversion, places of water use, and water conveyance structures. Title all maps, and include a scale and a north arrow.
- C. Include verification of deeds, easements, or right-of-way agreements that will be required to complete your project, or describe property agreements that will be needed to begin the project. Water right certificates, proof-of-use rights, or acknowledgment of water right claims should also be included. Some construction projects may require other permits. Prepare a list of permits you have obtained, or must obtain to complete the project.

ENVIRONMENTAL ASSESSMENT

Instructions: Complete the following assessment.

1. Does the project deal solely with the rehabilitation of facilities? Yes _____ No _____

2. Will the proposed project or activity take place on or near a state or federal:
 - a. wild and scenic river
Yes _____ No _____ If yes, where _____
 - b. wilderness area
Yes _____ No _____ If yes, where _____
 - c. primitive area
Yes _____ No _____ If yes, where _____
 - d. wildlife management area
Yes _____ No _____ If yes, where _____
 - e. recreational site
Yes _____ No _____ If yes, where _____

3. Will the project divert water from a blue ribbon stream or similarly important fishery?
Yes _____ No _____ If yes, where _____

4. Will the proposed project or activity take place on or near:
 - a. big game winter or seasonal range
Yes _____ No _____ If yes, where _____
 - b. upland game bird habitat
Yes _____ No _____ If yes, where _____
 - c. bald eagle nesting sites
Yes _____ No _____ If yes, where _____
 - d. waterfowl and furbearer habitats
Yes _____ No _____ If yes, where _____
 - e. important riparian or wetland areas
Yes _____ No _____ If yes, where _____

5. Is saline seep (soil salinity) a present or potential problem in the vicinity of the proposed project or activity?
Yes _____ No _____
6. Are there any sites of historic or prehistoric importance near the proposed project or activity?
Yes _____ No _____
If yes, where _____
7. Are there any present land uses that would be limited or precluded if the proposed project or activity is undertaken?
Yes _____ No _____
If yes, what _____
8. Is there any other information about the environmental or social impact of the project that should be taken into consideration?
- _____
- _____
- _____
- _____

Department of Natural Resources and Conservation
Water Development Private Loan Program

FINANCIAL NARRATIVE AND BUDGET FORM
INSTRUCTION SHEET

IF YOU WANT BOTH A GRANT AND LOAN, COMPLETE THE FOLLOWING FINANCIAL NARRATIVE AND BUDGET FORMS. DO NOT COMPLETE THOSE IN THE GRANT APPLICATION.

I. Instructions for Narrative

The narrative must clearly demonstrate that the project or activity can be done within the proposed budget. In your narrative, provide a general discussion of the spending plan. The financial narrative should make clear the reason why the budget was developed as proposed. Include the source of all cost estimates. Discuss the cost of the selected project as opposed to the alternate project plan described in the technical feasibility section.

You must demonstrate that you are able to repay the loan. For individuals, the financial statements, profit and loss statements, and projected operating budget for the project establishes your loan repayment capability. For associations or applicants representing rural water systems, you must state the number of users who will amortize the debt, and if property assessments, user fees, a combination, or other revenues will be used for repayment. If applicable attach the current charges of the system to the application and describe them in the narrative along with anticipated rate increases needed to repay the proposed loan. Use a 9 percent interest rate and 15-year term to estimate the loan repayment.

Identify all funding sources for your project. Describe your efforts to secure those funding commitments. If you applied to other funding agencies, give the date of the application, when a funding decision is expected, and state whether it is a grant or loan request. State how much money you will provide and describe your in-kind contributions. If you plan to borrow from the private sector, fully describe your borrowing plans. Include in the financial feasibility narrative any other information that would be helpful in assessing your financial commitment to completing the project.

II. Instructions for Budget

- A. Use the budget forms provided. Some forms are for agricultural applicants only while others apply only to nonagricultural applicants. Budgets should estimate costs as completely and accurately as possible. The forms include major expense categories, and separate the actual project costs from the administrative, engineering, land acquisition, and permitting costs, which are sometimes not anticipated. Amend the budget

forms as needed to fit your particular project. Construction projects should include a minimum contingency expense of 10 percent of construction costs to cover unexpected expenses. An inflation contingency may be included as a project cost, and must be identified as such on the budget form.

- B. Complete the Statement of Financial Condition. It provides the basic statistics about your assets and debts.
- C. Include copies of cover letters for funding applications to other agencies, and letters of inquiry and responses.
